

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of: Spencer A. Rathus, et al.

Serial No.: TO BE ASSIGNED

Group Art Unit: TBA

Filed: January 25, 2001

Examiner: TBA

For: METHOD AND APPARATUS FOR
ACCESSING ELECTRONIC DATA
VIA A FAMILIAR PRINTED MEDIUM

Atty. Doc. No.: 660-021

Honorable Commissioner of Patents and Trademarks
Washington, D.C. 20231

SUPPLEMENTAL PRELIMINARY AMENDMENT

Prior to substantive review of the subject application,
please amend as follows:

IN THE CLAIMS

Please cancel claims 1-167. Please add the following new
claims:

168. A system for displaying programming to a user, the system

comprising:

a printed magazine having at least one machine

recognizable feature;

a feature recognition unit having associated therewith

a means for recognizing said feature and a means

for transmitting a coded signal in response to the

PATENT
IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

recognition of said feature;
an intelligent controller having associated therewith a
means for accessing said programming material in
response to receiving said coded signal; and
a display unit for presenting said programming
material.

169. A system as defined in claim 168 wherein said at least one
machine recognizable feature has associated therewith a data
link which is recognized by said recognition unit.

170. A system as defined in claim 169 wherein said data link
comprises an image data link.

171. A system as defined in claim 169 wherein said data link
comprises a video data link.

172. A system as defined in claim 169 wherein said data link
comprises a programming data link.

173. A system as defined in claim 169 wherein said data link

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

comprises a sound data link.

174. A system as defined in claim 169 wherein said data link comprises an on-line data link.

175. A system as defined in claim 169 wherein said data link comprises a on-line shopping data link.

176. A system as defined in claim 169 wherein said data link comprises a pictorial data link.

177. A system as defined in claim 169 wherein said data link comprises an electronic data link.

178. A system as defined in claim 169 wherein said data link comprises an electronic media link.

179. A system as defined in claim 169 wherein said data link comprises an "information superhighway" data link.

180. A system as defined in claim 179 wherein said "information

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

superhighway" data link comprises the internet.

181. A system as defined in claim 179 wherein said "information superhighway" data link comprises the world wide web.

182. A system as defined in claim 179 wherein said "information superhighway" data link comprises a computer network.

183. A system as defined in claim 179 wherein said "information superhighway" data link comprises an ISDN network.

184. A system as defined in claim 179 wherein said "information superhighway" data link comprises a telephone line.

185. A system as defined in claim 179 wherein said "information superhighway" data link comprises a CATV line.

186. A system as defined in claim 179 wherein said "information superhighway" data link comprises a local area network.

187. A system as defined in claim 179 wherein said "information

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

superhighway" data link comprises a wide area network.

188. A system as defined in claim 179 wherein said "information superhighway" data link comprises a data communications network.

189. A system as defined in claim 179 wherein said "information superhighway" data link comprises an Internet Product Service Directory.

190. A system as defined in claim 179 wherein said "information superhighway" data link comprises a globally based digital communications network.

191. A system as defined in claim 179 wherein said "information superhighway" data link comprises a wireless network link.

192. A system as defined in claim 179 wherein said "information superhighway" data link comprises a Wireless Application Protocol internet.

PATENT
IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

193. A system as defined in claim 179 wherein said "information superhighway" data link comprises an ethernet network.
194. A system as defined in claim 179 wherein said "information superhighway" data link comprises a RF cellular network.
195. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a bar code.
196. A system as defined in claim 195 wherein said bar code comprises a Universal Product Code.
197. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an invisible bar code.
198. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a magnetic code.
199. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a printed character.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

200. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a symbol.
201. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a pictorial icon.
202. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an invisible indicia.
203. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a two-dimensional figure.
204. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an icon.
205. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an invisible icon.
206. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a watermark.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

207. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an invisible watermark.

208. A system as defined in claim 207 wherein said invisible watermark comprises a digital watermark.

209. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a series of alphanumeric characters.

210. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a binary code.

211. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a digital watermark.

212. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a magnetic strip.

213. A system as defined in claim 168 wherein said at least one

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

machine recognizable feature comprises a code.

214. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an on line shopping product code.

215. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a home shopping product code.

216. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an online shopping service code.

217. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a home shopping service code.

218. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an analog pattern.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

219. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a hieroglyphic character.
220. A system as defined in claim 168 wherein said printed magazine has associated therewith a commercial advertisement.
221. A system as defined in claim 168 wherein said printed magazine has associated therewith a personal advertisement.
222. A system as defined in claim 168 wherein said printed magazine has associated therewith a story.
223. A system as defined in claim 168 wherein said printed magazine has associated therewith an editorial.
224. A system as defined in claim 168 wherein said programming material comprises information.
225. A system as defined in claim 224 wherein said information

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

comprises product information of an advertised product.

226. A system as defined in claim 224 wherein said information comprises company information.

227. A system as defined in claim 224 wherein said information comprises additional information about an article.

228. A system as defined in claim 224 wherein said information comprises additional information about an editorial.

229. A system as defined in claim 168 wherein said programming material comprises a web page related to an advertiser.

230. A system as defined in claim 168 wherein said programming material comprises a web page related to said printed magazine.

231. A system as defined in claim in 168 wherein said programming material comprises a service.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

232. A system as defined in claim 231 wherein said service includes displaying promotional programming on said display unit of said user.

233. A system as defined in claim 231 wherein said service includes conducting an interaction with said user via a telephone.

234. A system as defined in claim 231 wherein said service includes conducting an interaction between a plurality of users via an online communication chat link.

235. A system as defined in claim 168 wherein said display unit comprises a personal computer.

236. A system as defined in claim 235 wherein said personal computer comprises a laptop computer.

237. A system as defined in claim 168 wherein said display unit comprises a television.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

238. A system as defined in claim 168 wherein said display unit comprises a device containing a microprocessor.

239. A system as defined in claim 238 wherein said device containing a microprocessor is hand-held.

240. A system as defined in claim 238 wherein said device containing a microprocessor is portable.

241. A system as defined in claim 168 wherein said display unit comprises a personal digital planner.

242. A system as defined in claim 168 wherein said display unit comprises an internet appliance.

243. A system as defined in claim 168 wherein said display unit comprises a cellular telephone.

244. A system as defined in claim 168 wherein said display unit comprises a wireless communication device.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

245. A system as defined in claim 168 wherein said display unit comprises a simulated book.
246. A system as defined in claim 168 wherein said display unit comprises an intelligent terminal.
247. A system as defined in claim 168 wherein said display unit comprises a web-based television.
248. A system as defined in claim 168 wherein said display unit comprises a pager.
249. A system as defined in claim 168 wherein said display unit comprises an Internet-enabled telephone.
250. A system as defined in claim 168 wherein said recognition unit is selected from a group consisting of a hand-held unit, a scanner, a bar code scanner, an optical code reader, an optical reader, a personal camera, a personal computer reader, a digital camera, a digital mouse and an optical

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

mouse.

251. A system as defined in claim 250 wherein said recognition unit is linked to a personal computer.

252. A system as defined in claim 250 wherein said recognition unit is linked to a wireless interface.

253. A system as defined in claim 252 wherein said wireless interface comprises a wireless network.

254. A system as defined in claim 253 wherein said wireless network comprises a cellular network.

255. A system as defined in claim 252 wherein said wireless interface comprises a cellular telephone.

256. A system as defined in claim 252 wherein said wireless interface comprises a pager.

257. A system as defined in claim 252 wherein said wireless

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

interface comprises a wireless personal computer.

258. A system as defined in claim 252 wherein said wireless interface comprises a personal digital assistant.

259. A system as defined in claim 250 wherein said recognition unit is linked to a personal digital assistant.

260. A system as defined in claim 250 wherein said recognition unit is linked to an Internet appliance.

261. A system as defined in claim 250 wherein said recognition unit is linked to a television set.

262. A system as defined in claim 250 wherein said recognition unit comprises a portion of a cellular telephone.

263. A system as defined in claim 250 wherein said recognition unit comprises a portion of a personal digital assistant.

264. A system as defined in claim 250 wherein said recognition

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

unit comprises a portion of a remote control unit.

265. A system as defined in claim 250 wherein said recognition unit comprises a portion of a handwriting implement.

266. A method of providing a user access to programming material, comprising the steps of:

imprinting a machine recognizable feature within a
magazine;
scanning said machine recognizable feature of said
magazine; and
transmitting data associated with said machine
recognizable feature via a communication link to
access said programming material, wherein said
programming material is related to said magazine.

267. The method of claim 266 wherein said communication link includes the Internet.

268. The method of claim 266 wherein said machine recognizable feature is selected from a group consisting of bar code,

PATENT
IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

universal product code, invisible bar code, magnetic code, printed character, symbol, icon, invisible indicia, two-dimensional figure, icon, invisible icon, watermark, invisible watermark, digital watermark, series of alphanumeric characters, binary code, digital watermark, magnetic strip, code, analog pattern, and hieroglyphic character.

269. A method of providing a user access to supplemental programming material associated with a magazine, comprising the steps of:

imprinting a machine recognizable feature within said magazine wherein said machine recognizable feature has associated therewith a command sequence for accessing programming material;

scanning said machine recognizable feature within said magazine and downloading data indicative of said machine recognizable feature via the Internet to a remote server;

accessing programming material from said remote server;

and

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

transmitting said programming material to said user
allowing said user to perceive said programming
material in a humanly perceivable form, wherein
said programming material is related to said
magazine.

270. The method of claim 269 wherein said programming material
comprises multimedia.

271. The method of claim 269 wherein said machine recognizable
feature is selected from a group consisting of a bar code, a
universal product code, invisible bar code, magnetic code,
printed character, symbol, icon, invisible indicia, two-
dimensional figure, icon, invisible icon, watermark,
invisible watermark, digital watermark, series of
alphanumeric characters, binary code, digital watermark,
magnetic strip, code, analog pattern, and hieroglyphic
character.
